Equipment for delivery rooms and medical accessories

Easy to clean and hygienic – febromed MEGA DUO oval med

In accordance with the special hygienic requirements in medical facilities, we have developed the MEGA DUO oval med relaxation pool in cooperation with the bathing facility manufacturer Kaldewei.

Impact-proof, chemical- and color-resistant

The smooth, glashy surface of the MEGA DUO oval med, according to DIN ISO 4532, is impact, scratch and abrasion resistant - It does not even cause microscopic scratches. Bacteria do not have a chance to settle. The beautiful, but also hard-wearing surface also convinces with regard to their care properties.

With the persistently stoved pearl effect, the water simply pearls off the bathtub while absorbing almost all dirt and lime particles. Even dried water spots and limescale residues can be easily removed. You need only a soft, damp cloth for cleaning. Thus, the tub always looks like new.

The tub is made of high-grade steel enamel 3.5 mm at Kaldewei according to own recipe. Steel enamel 3.5 mm is resistant to all cosmetic and medical bath additives and perfumes that are tolerated by human skin, in accordance with DIN ISO 2722, class AA. Steel enamel 3.5 is lightfast and resistant to UV light. Therefore it does not fade, even after 30 years of use.

accessories

Pool grip

It is particularly high drawn and ensures a firm hold without having to bend over to the tub rim.

Armature column

With double inflow tap and terminal filter system with quick-coupling adapter.

PELVITUB® cushion

Firm adhesion by 9 suction cups at the bottom; variabel in use.

Lighting set Spectrallight

Offers a pleasant bathing experience due to lighting effects full of atmosphere.

Heating

Maintains the water temperature at a constant rate to prevent cooling.

COMFORT SELECT

The electronic control unit with control panel offers the following additional functions:

- Water level sensor, prevents from overflowing
- Opening and closing the valve cone
- Shower function
- Temperature settings
- Child protection
- Cleaning lock
- Running time bathtub filling
- Thermal disinfection of the outlet pipes with a water temperature of 65 °C

SOUNDWAVE

The innovative bath-audio-system makes the Meda Duo med oval a sound body.

The several components including the Bluetooth® receiver are hidden under the bathtub.

The receiver can play audio files from any Bluetooth®-enabled device wirelessly.

PALL-FILTER

Optional use of Pall filters to prevent water germination; Legionella prevention.
