

#### For your patients:

- Safe support in any position
- The sling can be swiveled 360° and therefore can be used universally (in combination with a bathtub, bed or our delivery systems such as Multitrac®, Combitrac®, Pelvitrac®, Duoetto®)

#### For your staff:

- Ergonomic working
- Reduced physical workload
- More time for patient contact
- Fast and safe changing of the sling without risk of injury to the staff
- No restrictions on working area

#### For your facility:

- To combine versatile with existing bathtubs, delivery systems (Multitrac®, Combitrac®, Pelvitrac®, Duoetto®) or beds
- Small space requirement
- Mounting on wall, floor or ceiling on customer request

Equipment for delivery rooms and medical accessories

# febromed Variotrac® – as stand, wall or ceiling model – the multifunctional solution.

With the 360° swivelling Variotrac® sling, febromed makes an important contribution to a safe and health-promoting workflow in your birthing room.

Whether on a bed, a birthing stool, a bathtub or a ball – it can be used flexibly with a small space requirement in a modern design. Our sling provides a significant additional benefit for patients, staff and ultimately for your institution.
